## OBJECTIVE

Enthusiastic and self-taught Front-End Web Developer with a strong foundation in HTML, CSS, and JavaScript. Leveraging my engineering background, fluency in English, and sales and business experience, I am exploring a new horizon in my professional life.

Over the past six months, I have acquired a solid understanding of the fundamentals of web development and am eager to apply my skills to contribute to a tech industry team.

My goal is to collaborate with a forward-thinking company where I can actively participate in solving complex problems and developing innovative features. I am a fast learner, proficient in understanding intricate topics and challenges.

With a strong focus on client satisfaction, I am committed to delivering high-quality solutions that meet both technical and business requirements. I am excited to contribute to a team that values creativity, growth, and continuous improvement.

## EXPERIENCE

Pucón  
Nov 2021 - Mar 2023

### Entrepreneur Rumen Carnes Ahumadas

Opened a Restaurant and Food Processing Company dedicated to preparing BBQ Texas smoked meats. As a co-owner I oversee cooking and manufacturing of different products, also selling our portfolio of frozen vacuum sealed smoked meats, cooking animal fats, clarified butter and sauces. Permanent communication with costumers and suppliers. Setting up events to promote our brand and products.

Santiago de Chile  
Nov 2019 - Dec 2020

### Entrepreneur Pan Meru

Pan Meru was a family project that started with the idea of baking a gluten free sourdough bread as delicious and soft as regular wheat bread for a newborn nephew with celiac disease. In a period of six months, I worked developing a delicious and nourishing sourdough bread that was gluten-free, allergen-free and made from minimal ingredients. Afterwards I oversaw production and shipping. I also took part in the marketing and sales campaigns through social media. Unfortunately the progress of the new company was thwarted by the social unrest in Chile and the COVID-19 Pandemic.

Opened a Restaurant and Food Processing Company dedicated to preparing BBQ Texas smoked meats. As a co-owner I oversee cooking and manufacturing of different products, also selling our portfolio of frozen vacuum sealed smoked meats, cooking animal fats, clarified butter and sauces. Permanent communication with costumers and suppliers. Setting up events to promote our brand and products.

Santiago de Chile  
Dec 2015 - Oct 2016

### Sales Associate Zuñiga Martinez

-Collaborated directly with a wide range of Industry clients, supplying materials such as refractory ceramic fibers, glass fibers, Kevlar, Teflon, and gaskets & joints. Ensured to assist and support maintenance personnel mainly by advising them on how to solve problems with high temperature equipment and fluid control.

Santiago de Chile  
Nov 2016 - Oct 2017

### Sales Associate Küpfer S.A.

-Increased sales and promoted new products in the fields of welding consumables, equipment and plasma cutting machinery. Prepared quotes, performed regular follow-ups, processed purchase orders, and increased sales by promoting new product lines.

Valencia, Venezuela  
Aug 2012 - Sep 2013

### Sale Representative RIESE INDUSTRIAL

-Maintained direct contact with costumers from different industries by responding to their inquiries and giving them technical support about all the products that I provided.  
-Gained a practical, scientific view of the properties and applications of refractory materials such as monolithic fibers, bricks, lubricants, gaskets, and fire protection equipment.

## EDUCATION

Caracas, Venezuela  
Sep 2005 - Jun 2011

### Materials Engineer Simón Bolívar University

-Heavy focus on metallurgy and ceramics. Studied steel alloys, industrial, and structural ceramics (refractories, concrete, asphalt, porcelain.). Also focused on extractive metallurgy techniques such as chemical reduction, melting, and casting with a working knowledge of electrolytic cell corrosion mechanisms and high temperature oxidation.  
-Final Project carried out in Madrid-Spain (ICV Glass and Ceramic Institute) titled Ceramic Materials for Solid Oxide Fuel Cells in which I created a vitroceramic seal that was used to increase the efficiency of fuel cells. Throughout the research I used a wide range of laboratory technics and characterization procedures. During the internship I was sent to Aachen-Germany in order to study a new ceramic compound that was expected to improve the properties of the specific seal.

Dublin, Ireland  
- 2013 - 2014

### Advanced English C1 Centre of English Studies

The course consisted of six months of theory and six months of working holidays, I worked as a cashier in a Grocery Store.

## SKILLS

- HTML
- CSS and TailwindCSS
- JavaScript / React JS

## LANGUAGES

**English**  
Advanced

**Spanish**  
Native

**German**  
Basic A2

## PROJECTS

Shopping List App

Web application that enables user registration and seamless shopping list management. With a focus on efficiency and convenience, the application allows you to create, mark, and delete items on your shopping lists.

Technologies utilized:

FrontEnd:

React JS (with Vite), along with powerful libraries like React-Hook-Form with Yup, Tailwind CSS, and Axios.

BackEnd:

Node JS, Express JS, Mongoose, MongoDB, Passport Local Strategy with JWT, and Bcrypt.

Deployment:

GIT and GitHub for version control, Render for backend deployment, and Vercel for frontend hosting.
